

**FISH Analyses**

Prices of the tests are in Euro, but can be converted to your local currency with the [currency converter](#).

**1. Microdeletion Syndromes**

Please send:

- at least 3 ml of heparinised (Na of Li) whole blood,
- or 10 to 20 ml of amniotic fluid,
- or at least 10 mg of chorionic villi.

### 3. Leukemias and Lymphomas

Please send:

- at least 3 ml of bone marrow in Na or Li heparine vacutainers containing sterile transport medium (RPMI plus 10% FCS),
- or at least 5 mg of biopsy in a sterile recipient with transport medium (RPMI plus 10% FCS),
- or freshly made, unfixed bone marrow smears,
- or touch slides (for lymphomas, only briefly touch the slide on at least 3 areas, adherent cell clumps should be hardly visible by the eye).
